

KAZI MD. WAZEH ULLAH FARHAN

Software Development · Cybersecurity · AI/ML · IT

Dhaka, Bangladesh | +880 1828-658811 | wzullah.farhan@gmail.com | github.com/wazehfarhan | linkedin.com/in/w2zfrhn

SUMMARY

CSE student at AIUB (all coursework completed; graduating on internship completion) with hands-on projects across web development, network security, and machine learning: full-stack PHP/MySQL systems with role-based access, a language interpreter with a browser IDE, a full VM penetration test, and IEEE-format papers on malware drift and code-smell detection. Seeking an internship in Software Development, Cybersecurity, AI/ML, or IT.

TECHNICAL SKILLS

Web & Backend: PHP 7.4+, JavaScript (ES6+), Node.js, REST APIs, sessions, CSRF protection, bcrypt, HTML5/CSS3, Bootstrap 5, MySQL, SQL Server, 3NF schema design

Languages: Python, C#, Java, C/C++, SQL

AI / ML: PyTorch, LightGBM, Logistic Regression, SVM, Random Forest, Naive Bayes, NLP classification, model evaluation, prompt engineering, LLM workflows

Security & Networking: Kali Linux, penetration testing, STRIDE, MITRE ATT&CK, Cyber Kill Chain, firewalls, IDS/IPS, Cisco ACLs, TCP/IP, DNS, DHCP, HTTP/S

Tools: Git, GitHub, VS Code, XAMPP, Apache, MySQL Workbench, TCPDF, Jupyter/Colab

EXPERIENCE

Artificial Intelligence Intern — *FlyRank AI, Remote (Chicago, IL)*

Jul 2026 – Present

- Build and test LLM-driven automation workflows in Python using prompt engineering; evaluate model outputs on NLP tasks in a remote team.

Freelance Web Developer — *Self-Employed, Remote*

Jan 2024 – Present

- Delivered 5+ custom PHP/MySQL web applications for small businesses as sole developer: requirements, database design, UI, deployment, and handover.

PROJECTS

Mealing Online — *Multi-role hostel meal management (PHP, MySQL, Bootstrap 5, TCPDF)*

[GitHub](#)

- 3-tier RBAC (Super Admin / Manager / Member) with bcrypt, CSRF tokens, and session regeneration; replaced spreadsheet billing across multiple houses.
- Normalized 8-table MySQL schema with foreign keys for multi-house data isolation; REST dashboard analytics and automated TCPDF report exports.

Bhai Bhai — *Bengali-keyword language with browser IDE (JavaScript, Node.js)*

[Live](#) | [GitHub](#)

- Tokenizer, parser, AST, and tree-walking interpreter; in-browser IDE with syntax highlighting and autocomplete; Node.js CLI runner and regression tests.

Security Assessment of an Unknown System — *Kioptrix Level 1 pentest (Kali Linux, course project)*

- Gained access through Samba and escalated to root via CVE-2003-0127; delivered a full assessment report. Also completed a Metasploitable2 exploitation lab.

TRIAD — *Drift detection for malware classifiers (Network Security final-term paper)*

- Studied concept drift in a LightGBM classifier on EMBER2017/2018; proposed a type-aware, evidence-gated drift detection and adaptation policy.

God Class Code-Smell Detection — *IEEE-format paper, team of four (Python)*

- Compared LR, SVM, Random Forest, and stacking: SVM best F1 (74.58%), stacking best AUC-ROC (94.72%).

ML coursework — *Traffic Sign CNN (PyTorch, 58 classes) · Emotion/Sentiment NLP classifier (Naive Bayes, LR, SVM)*

Also: Windows XP OS Portfolio ([Live](#) | [GitHub](#)) · GameHub ([Live](#) | [GitHub](#))

EDUCATION

B.Sc. in Computer Science and Engineering — *AIUB, Dhaka* | CGPA: 3.57 / 4.00

Internship pending

Higher Secondary Certificate — *Holy Land College, Dinajpur* | GPA: 5.00 / 5.00

2019 – 2021

CERTIFICATIONS & LANGUAGES

AWS CLF-C02 — in progress | Laravel, React — in progress | Bengali (Native), English (Professional)
